

# Billy Can® Stampede™

## Dianella caerulea

| AT A GLANCE  |        |                             |            |            |            |
|--------------|--------|-----------------------------|------------|------------|------------|
| FOLIAGE      | FLOWER | HABIT                       | HEIGHT     | WIDTH      | SPACING    |
|              |        |                             |            |            |            |
| Bright Green | Blue   | Underground spreading clump | 0.35–0.45m | 0.40–0.50m | 0.30–0.50m |

**Best for:**  
Edging paths or as a ground cover for revegetation and stabilizing embankments. Best to 5°C but will tolerate 0°C.

## Neat upright evergreen tufts.

Stampede™ is a quick growing *Dianella caerulea* which spreads with underground rhizomes. This characteristic enables it to create a mat of roots and foliage for ground stabilization and weed suppression. Stampede is a great understory plant creating spreading tufts of upright green foliage, especially useful in large garden spaces.

Stampede is a compact variety reaching 35-45 cm in height. In warmer climatic regions expect Stampede to reach 45 cm.

**Position:** Stampede grows equally well in sun and shade. A hardy fuss-free variety.

**Multi-plant:** Space at 50cm for neat tufts of individual clumps or at 40cm to create a verdant green ground cover, which not only looks good it offers weed suppression and ground stabilization.

**Care:** A tough variety that requires minimal care to retain a tidy appearance.

### Pictures

1. Stampede in gravel courtyard.
2. Stampede spreads by producing underground shoots that emerge up to 0.5m away from the original plant.
3. 14cm pot of Billy Can® Stampede™ available at retail.

Stampede is the trade name of protected variety 'Newplad1'<sup>(D)</sup>
