Dianella revoluta Coolvista™

AT A GLANCE

FOLIAGE	FLOWER	HABIT	HEIGHT	WIDTH	SPACING
					
Grey Green	Blue	Upright Clump	0.45m	0.4m	0.5m

Best for:

Contrasting grey-green colour, borders next to pathways or driveways, courtyards.

Climatic Zone: 1 - 3

A cool colour ...

Coolvista™ offers the landscape designer a grey-green swathe of colour in a stiff upright texture.

This vigorous variety quickly forms a dense clump, producing many side shoots that emerge from around the plant base. The overall appearance is a grey-green tuft.

Best growing conditions

Coolvista is particularly suited to climate zone 1 with dry summers. It can also be grown in zones 2 and 4 where wet summers normally prevail but in these wet zones it may need to be pruned at the end of summer to remove old foliage. During the summer, autumn and winter new foliage will develop.

Pictures

1. Ideally suited to garden spaces amongst pavement.
2. Coolvista grown in 17 cm and 13cm pots.
3. New shoots emerge to form a wide grey-green clump.

Coolvista is the trade name of protected variety 'Allyn-Citation'

The words 'Design Edge' and 'Coolvista' are trade marks of Sprint Horticulture Pty Ltd

Climate Zones

Over the past years Australia has experienced some extreme weather from droughts to significant rainfall. The climatic tolerances of a variety must therefore be measured not just according to temperature extremes, but also by seasonal rainfall patterns. The adjacent map shows four major climate zones for the Australian continent. Zones 2 and 4 have wet summers while Zones 1 and 3 have wet winters.

To assist in variety selection, please review the Specification Sheet above which nominates the recommended climate zone for each variety.
