Dianella revoluta Dinky Di[®]

Colour	Habit	Height	Width	Spacing between plants
				
Green	Dense plume	25-45cm	30-45cm	30-50cm

Best for:
Use as a border next to pathways or driveways. A neat habit ideal for courtyard areas.

Climatic Zones: 1 - 4

Lush and low growing

In the landscape Dinky Di will maintain a neat and tidy appearance, it will not fall over or look messy. These attributes are preferred by landscapers and developers who care about the long term appearance of a project.

Dinky Di develops a very neat, symmetrical appearance. Whilst its leaves resemble those of *Dianella caerulea*, it has the clump forming habit of a *Dianella revoluta* making it perfect for use as a low border along pathways and in courtyards.

Dinky Di will grow at different rates according to the climate of a region – shorter in zones with dry summers and taller in zones with wet summers. When a solid row of foliage is required plant spacing will vary depending on the climate; plant 30cm apart in zones 1 & 3, and 45cm apart in zones 2 & 4.

Pictures

1. Dinky Di is great planted adjacent to paved areas.
2. This variety develops a neat, compact mound of foliage.
3. Dinky Di in a 14 cm pot.

Dinky Di is the trade mark name of protected variety 'Dinky Di'

Climate Zones

Over the past years Australia has experienced some extreme weather from droughts to significant rainfall. The climatic tolerances of a variety must therefore be measured not just according to temperature extremes, but also by seasonal rainfall patterns. The adjacent map shows four major climate zones for the Australian continent. Zones 2 and 4 have wet summers while Zones 1 and 3 have wet winters.

To assist in variety selection, please review the Specification Sheet above which nominates the recommended climate zone for each variety.
