Lime Green	Cream	Upright arching clump	0.70–1.0m	1.0m	0.70–1.0m

Best for:
Provides an exceptional lime green contrast against dark backdrops, and will brighten up any vista.

Climatic Zone: 1 - 3

A natural garden highlight

Lime Jet™ is a lime green variegated selection of *Lomandra longifolia*. It provides an exceptional lime contrast when planted in front of dark green backgrounds. It is especially useful to brighten dark or shaded vistas. As the flowers are positioned deep in the foliage it is well suited to high pedestrian areas as there is very little danger from getting spiked by drying flowers.

Lime Jet will perform superbly in zones 1 and 3 which experience dry summers. In zones 2 and 4 ensure that Lime Jet is planted in free draining soil to contend with wet summers. Very good in dry conditions and tolerates -5 C.

A mature size of 1 x 1m can be achieved in 3 years. Plant at 70cm spacings for rapid en-masse ground coverage, or at 1m apart to create individual tufts.

Pictures

1. Lime Jet forms an attractive tuft 1m x 1m
2. Lime Jet will add bright colour to plantings that are dark green
3. 14 cm pot plants ready for planting.

Lime Jet is the trade name of protected variety 'JB2Lime'

Climate Zones

Over the past years Australia has experienced some extreme weather from droughts to significant rainfall. The climatic tolerances of a variety must therefore be measured not just according to temperature extremes, but also by seasonal rainfall patterns. The adjacent map shows four major climate zones for the Australian continent. Zones 2 and 4 have wet summers while Zones 1 and 3 have wet winters.

To assist in variety selection, please review the Specification Sheet above which nominates the recommended climate zone for each variety.
