**Everillo**[Ⓛ]

Everillo's golden lime colouring will give a bright burst of colour to many areas. The natural cascading low growing habit makes it an easy match to co-plant with other varieties. When used as a groundcover plant every 30 to 45 cm for a beautiful foliage vista. Everillo is also ideal as a border to hard areas, for under planting around trees, or in large patio pots where its' natural cascading habit is accentuated.

Everillo is a very hardy variety and tolerates dry and saturated conditions. On site testing has provided excellent results across a huge climatic area from Cairns with tropical seasons to Hobart and across to Perth.

Everillo is from the new Evercolour Carex series. As the name suggests the Evercolour varieties provide year round colour - in both sun and shade!

Climate Zones

Over the past years Australia has experienced some extreme weather from droughts to significant rainfall. The climatic tolerances of a variety must therefore be measured not just according to temperature extremes, but also by seasonal rainfall patterns. The adjacent map shows four major climate zones for the Australian continent. Zones 2 and 4 have wet summers while Zones 1 and 3 have wet winters.

To assist in variety selection, please review the Specification Sheet above which nominates the recommended climate zone for each variety.
