

CARE NOTES — Plant, Grow, Display

GENUS: Hibiscus
SPECIES: *sinensis*

Quick Facts—

Height: to 1.5m, when planted in the garden
Width: to 0.8m
Position: Full sun
Flowering: Spring to Autumn
Use: Pots, tubs, bowls, garden

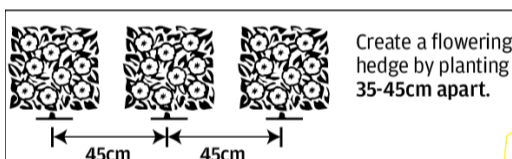

General plant Information—

Water Tips: Water to establish, then as required. Hibiscus prefer a well drained soil.
Planting Tips: Retain the same soil height from pot to garden or patio pot.
Fertiliser: Use a regular application of a controlled release fertiliser during Spring to Autumn.
Pruning Tips: Prune early spring to encourage growth and more flowers.

Garden Idea—

Create a flowering hedge

Plant 35 to 45cm apart to create a flowering hedge.
A clever and colourful way to establish a natural garden border.

Create a flowering hedge by planting 35-45cm apart.

Patio Pot Idea—

As a table decoration or as a free standing patio pot feature, Island Dream Hibiscus will colour any out door area with a continuous display of magnificent showy blooms throughout the warmer months.

Island Dream Hibiscus will give you the best, showiest display of Hibiscus flowers that last longer than other varieties.
